Laifen

Laifen independently designed and manufactured a high-speed brushless motor capable of an astonishing 110,000 rpm. This breakthrough innovation powered the Laifen LF01, the company’s very first fast-dry hairdryer, in 2020. Today, Laifen’s family of efficient, cutting-edge home accessories can be found in over five million households worldwide. With one-third of all employees working in R&D, Laifen remains focused on creating even more life-changing products.
